

TECHNICAL DATA SHEET

Janus Duo Card

Application	Janus Duo Card is used for full-color graphics, applications and professional color management. The surface is characterized by high ink absorption and very good drying properties. Create double-sided graphics, greeting cards or imposition proofs thanks to the double-sided ink absorption layer. Due to the special coating on top and back, printouts are immediately dry and smudge-proof.
Printer & Ink Compatibility	Janus Duo Card is best suited for desktop and large-format printing. The quality is universally printable with all common dye, pigment and UltraChrome (K3) inks
Processing:	Best printing results occur in a standard climate of 23°C and 50% relative humidity. For problem-free running, always store the printing medium in the original packaging and protect it from direct sunlight and moisture.
Basic weight	222 ± 16 g/m ² ISO 536
Paper Thickness	280 ± 16 µm ISO 534
Opacity	98 ± 16 % ISO 2471
Stiffness md	80 ± 9 mNm ISO 2493
Stiffness cd	40 ± 6 mNm ISO 2493
Smoothness	20 ± 4 S (Bekk) ISO 5627
CIE Whiteness	155 ± 10 % ISO 2469/2470
