**Label Elements**

**Hazard Symbol:**

![Hazard Symbol]

**Signal Word:** Danger

**Hazard Statement:**

Causes skin irritation.
Causes serious eye damage.

**Precautionary Statements**

**Prevention:**

Wash thoroughly after handling. Wear protective gloves/protective clothing/eye protection/face protection.

**Response:**

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. IF ON SKIN: Wash with plenty of water/... If skin irritation occurs: Get medical advice/attention. Immediately call a POISON CENTER/doctor. Specific treatment (see on this label). Take off contaminated clothing.

**Storage:**

Store locked up.

**Disposal:**

Dispose of contents/container to an appropriate treatment and disposal facility in accordance with applicable laws and regulations, and product characteristics at time of disposal.

**Other hazards which do not result in GHS classification:**

None.

4. First-aid measures

**General information:** CAUTION! First aid personnel must be aware of own risk during rescue!

**Ingestion:** Immediately rinse mouth and drink plenty of water. Keep person under observation. If person becomes uncomfortable take to hospital along with these instructions. Show this safety data sheet to the doctor in attendance.

**Inhalation:** Move injured person into fresh air and keep person calm under observation. If necessary, seek hospital and take along these instructions. Show this safety data sheet to the doctor in attendance.

**Skin Contact:** Immediately flush with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention. Wash contaminated clothing before reuse.

**Eye contact:** Flush thoroughly with water for at least 15 minutes. Get medical assistance.

**Most important symptoms/effects, acute and delayed**

**Symptoms:** See section 11 of the SDS for additional information on health hazards.

**Hazards:** See section 11 of the SDS for additional information on health hazards.

**Indication of immediate medical attention and special treatment needed**

**Treatment:** Skin and/or eye contact. Flush thoroughly with water for at least 15 minutes. Get medical assistance.

5. Fire-fighting measures

**General Fire Hazards:** No unusual fire or explosion hazards noted.
Suitable (and unsuitable) extinguishing media

**Suitable extinguishing media:**
Use fire-extinguishing media appropriate for surrounding materials.

**Unsuitable extinguishing media:**
Do not use water jet as an extinguisher, as this will spread the fire.

**Specific hazards arising from the chemical:**
During fire, gases hazardous to health may be formed.

**Special protective equipment and precautions for firefighters**

**Special fire fighting procedures:**
No data available.

**Special protective equipment for fire-fighters:**
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

### 6. Accidental release measures

**Personal precautions, protective equipment and emergency procedures:**
Use personal protective equipment. Put on protective equipment before entering danger area.

**Methods and material for containment and cleaning up:**
Stop the flow of material, if this is without risk. Absorb with sand or other inert absorbent.

**Notification Procedures:**
See Section 8 of the SDS for Personal Protective Equipment. For waste disposal, see section 13 of the SDS.

**Environmental Precautions:**
Avoid release to the environment. Prevent further leakage or spillage if safe to do so. Do not contaminate water sources or sewer. Environmental manager must be informed of all major spillages.

### 7. Handling and storage

**Precautions for safe handling:**
Provide adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

**Conditions for safe storage, including any incompatibilities:**
Store away from incompatible materials.

Appropriate Engineering Controls

Provide adequate ventilation. Educate and train employees in the safe use and handling of this product. Emergency showers and eye wash stations should be available.

Individual protection measures, such as personal protective equipment

General information: Provide easy access to water supply and eye wash facilities. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Follow training instructions when handling this material.

Eye/face protection: Safety goggles

Skin Protection

Hand Protection: Protective gloves should be used if there is a risk of direct contact or splash. Chemical resistant gloves required for prolonged or repeated contact. Butyl rubber (EN374) Glove thickness: > 0.70 mm Break-through time: > 480 min Risk of splashes: Nitrile rubber. Nitrile gloves are recommended, but be aware that the liquid may penetrate the gloves. Frequent change is advisable. The most suitable glove must be chosen in consultation with the gloves supplier, who can inform about the breakthrough time of the glove material.

Other: Wear suitable protective clothing as protection against splashing or contamination.
Respiratory Protection: Under normal conditions of use, respirator protection is not required. In case of inadequate ventilation, use respiratory protection. If respirators are used, OSHA requires compliance with its respiratory protection program (29 CFR 1910.134).

Hygiene measures: Do not get in eyes. Observe good industrial hygiene practices. Wash contaminated clothing before reuse. Do not get this material in contact with skin. Wash hands before breaks and immediately after handling the product. Avoid contact with skin.

13. Disposal considerations

**General information:** Waste disposal should be in accordance with existing federal, state and local environmental control laws.

**Disposal instructions:** Discharge, treatment, or disposal may be subject to national, state, or local laws. Since emptied containers retain product residue, follow label warnings even after container is emptied.

**Contaminated Packaging:** Dispose in accordance with all applicable regulations.

**US. RCRA Hazardous Waste Classification (40 CFR 261):** When discarded in its purchased form, this product meets the criteria of corrosivity, and should be managed as a hazardous waste (EPA Hazardous Waste Number D002).
